

Dr. Bernd Srocka studied physics and obtained his PhD in semiconductor physics at the Technical University Berlin in 1993. Starting with his diploma and thesis he was all the years dedicated to semiconductor metrology and processing physics as well as to metrology and inspection equipment development for the semiconductor industry. Since 2004 he has been working for HSEB in several positions within the R&D department. Since 2007 he is leading the development and became the VP Engineering of the UNITY SC with the merger of HSEB and Unity early this year.
